Sprayable thermoplastic guns

Sprayable thermoplastic gun „Type H“

- for machines of serie H9 / H16 / RM3D / H18 / H26 / H33 as well as for roadmarking trucks
- with automatic cutoff of atomising air
- with adjustable limiter
- without heating via thermal oil jacket
- **with nozzle set, calibration washers as well as limiter**

Applies for both types of guns:

Applied **material quantity** is **always** dependent on

- marking speed
- material
- environment conditions

¹⁾ Scope of supply: nozzle set, limiter and calibration washers in order to adjust atomising air volume are included

²⁾ Geometric modification in case material shows a tendency for center conglomeration

³⁾ Set of nozzles at lower throughput

⁴⁾ Nozzle set for trucks

⁵⁾ Including nozzle set
